RELIANCE RETAIL OUTLETS: OUR
RETAIL TRACK RECORD

THE BRIEF

Restaurant-ready sound, site after site

Busy dining areas need clear, evenly spread audio that blends into the restaurant's ceiling and design, and every site needs it the same way.

WHAT WE DELIVERED

Ceiling speakers and rack amplification

Our project footage shows flush ceiling speakers spread across the dining area, set into the acoustic ceiling grid alongside the lighting and AC cassettes. The amplifiers sit in a rack within the restaurant.

WHY MCDONALD'S INDIA CAN SCALE WITH US

Since 2019 Avenue Sound has installed PA systems in 1,019 Reliance Retail Outlets across 26 states and UTs, using a tracked, outlet-by-outlet rollout process. We are bringing that same discipline to our McDonald's work as it grows.

FROM OUR MANAGING DIRECTOR

"Every outlet opening is a deadline we don't miss. Same sound, same standard, from the first outlet to the thousandth."

Ashish Hingorani, Managing Director, Avenue Sound India

OPENING NEW RESTAURANTS?

See and hear our systems at our Experience Centers in Seawoods (Navi Mumbai) and Devanahalli (Bangalore).
